**INSIDE LOOK**

*Here is how we test...*

LOAC  
**VIDEO**  
club

**And more...**

# Why it was cool?

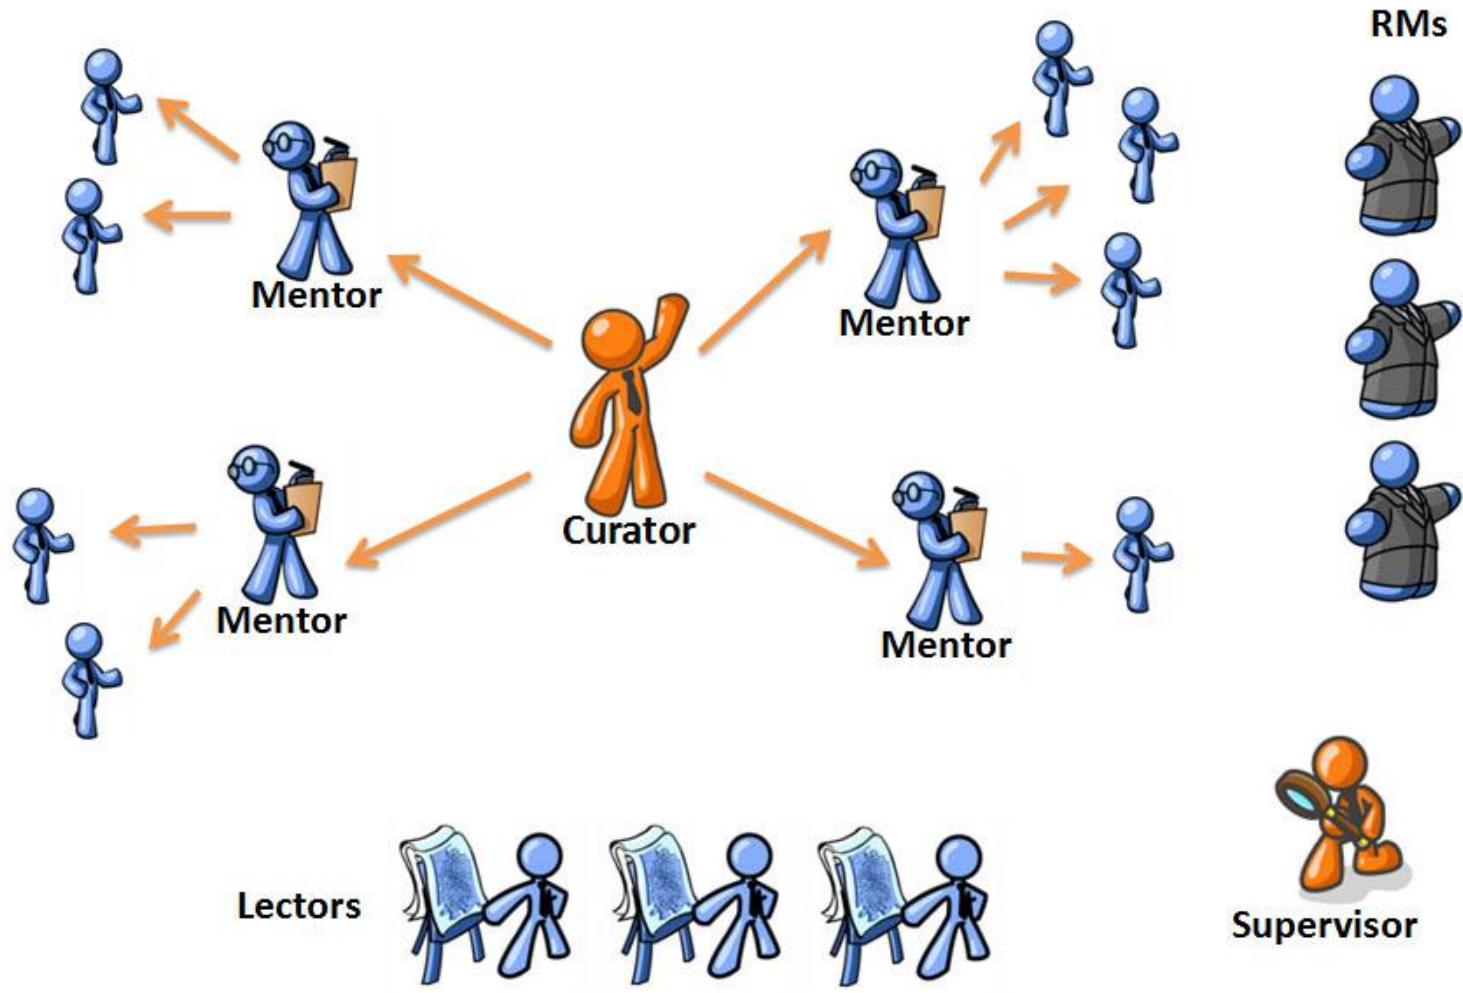

- Lots of FUN
- Freedom in choosing and attending
- Ability to try yourself in different roles
- Community spirit

# Why it wasn't perfect?

- Learning activities not systematic
- Not always connected with company needs
- Lack of practical tasks
- Often practical tasks are failed

results: **motivation decreasing**

# Mentorship Principles

# Mentorship Experience

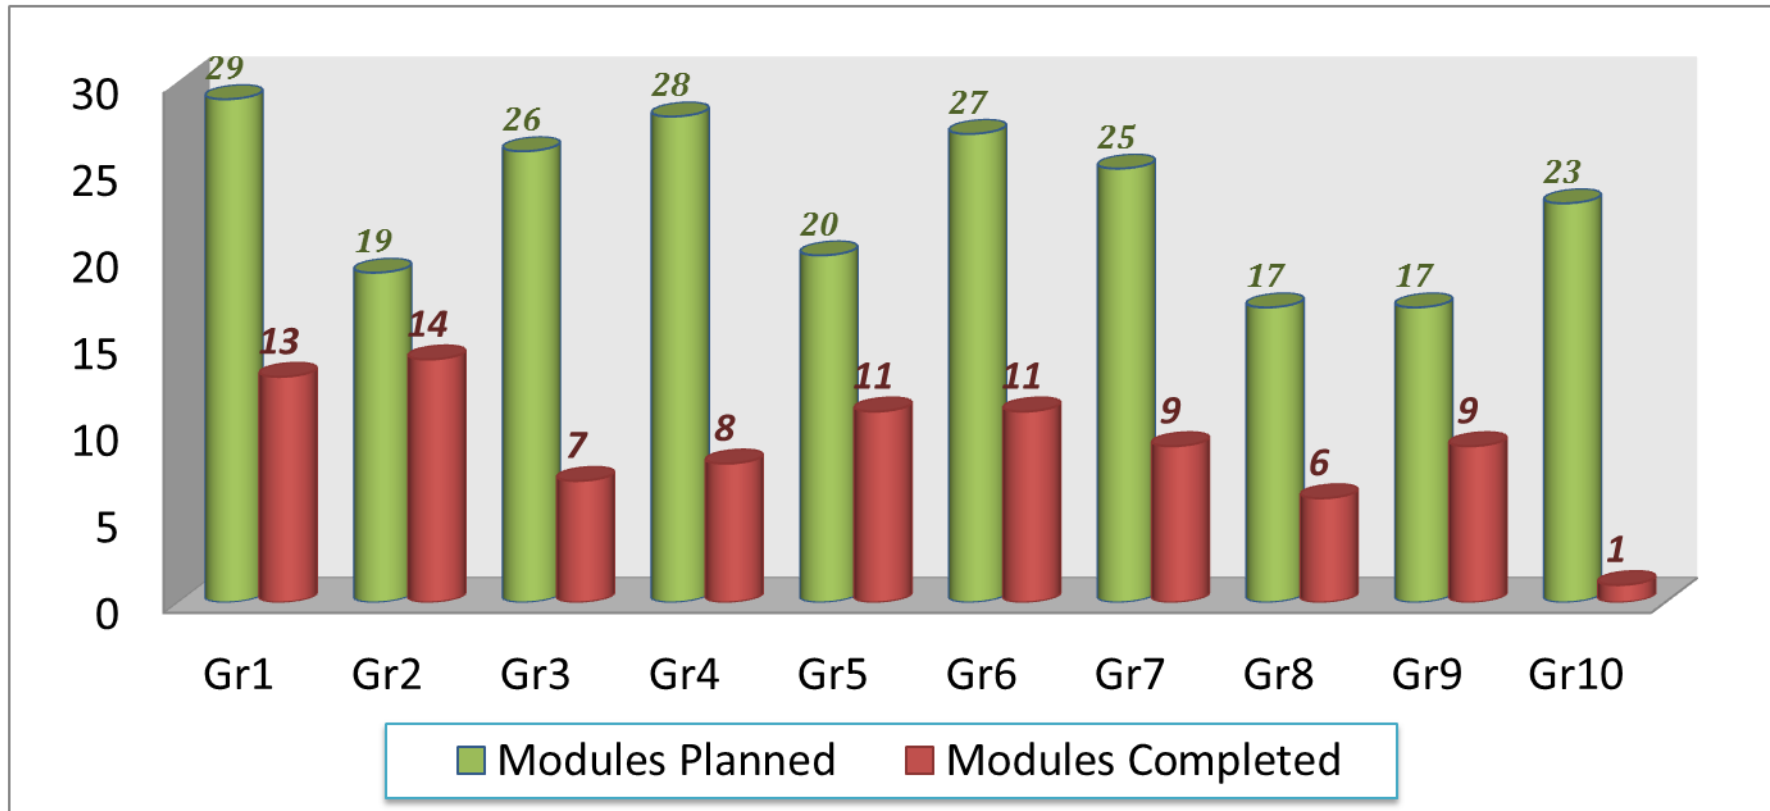

- Started in August 2010
- 10 groups/11 mentees (most of them of T2/T2+ level)
- Average education plan: 20-25 weeks
- No full time curator

# Achievements

## Modules:

## Weekly Progress Trends

# Why MP isn't perfect?

- You get bored after some time
- Massive by its size – hard to complete
- Mentors/curator are not always competent in the subject taken
- Tasks not related to real work
- 'Back to school' spirit again and again

# Why MP is still cool!

- Systematic  
(expertise map, education plan guidance)
- Regular lectures & practical assignments
- Controlled and predictable process
- Works well for Junior staff
- Most of materials available

# New Ideas

We're in progress of brainstorming... 😊

# New Ideas

Our strategy is simple:

Take the best from each approach, while eliminating weak sides at the same time

**Juniors** → *Tuned Mentorship Program*

# Tuned MP for Juniors

## **Target audience:**

Junior testers with no, or little experience

## **Goal:**

Teach them Testing Essentials to make them useful at the production projects, as quick as possible!

**Format:** BootCamp

Testing Essentials

**BOOT  
CAMP  
#1**

# Boot Camp Goals

We want to:

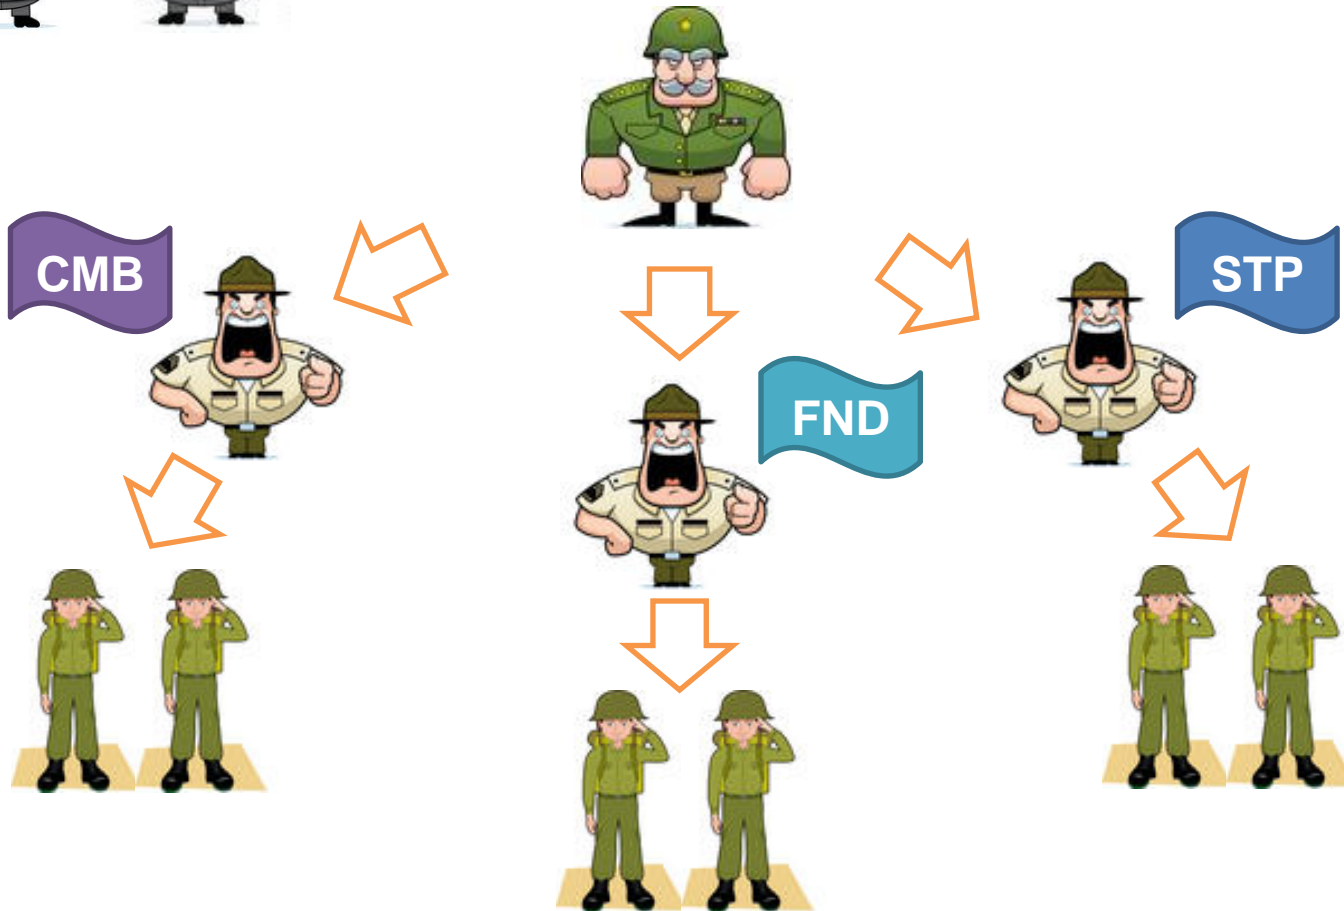

- Get prepared for **real production work a.s.a.p.**
- Start **doing things right** from the very beginning
- **Try out** own forces, **show good results** to others

# Boot Camp Core Principles

- Mentor and Mentee
- Dedicated Trainer for each Subject
- Minimum Theory, Lot of Practice
- Team work
- Real Project Simulation

# Boot Camp Organization

# Boot Camp Organization

Teams:

Team 1	Team 2

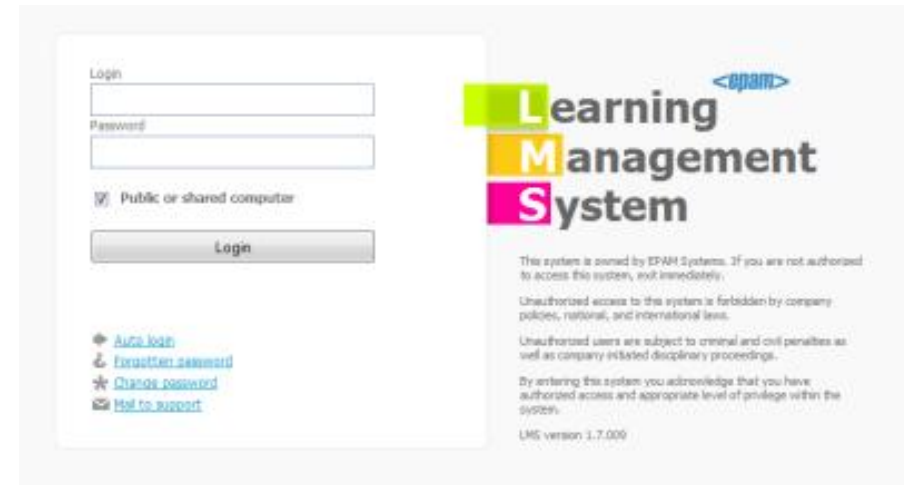

# Boot Camp Tools

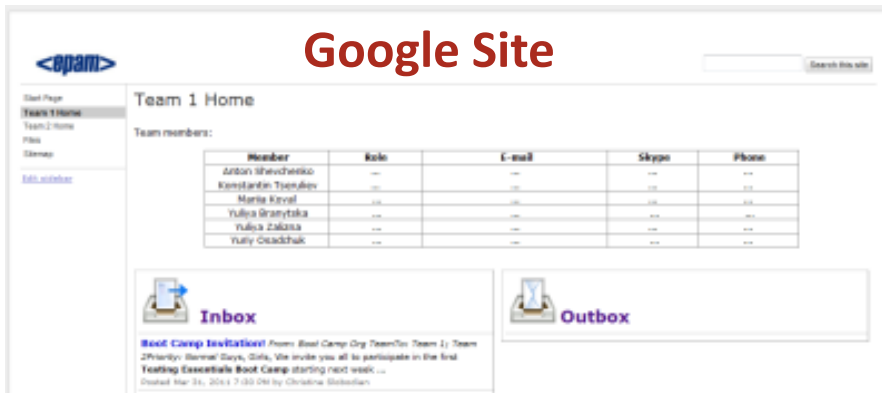

## Educational Plan

## Learning Management System

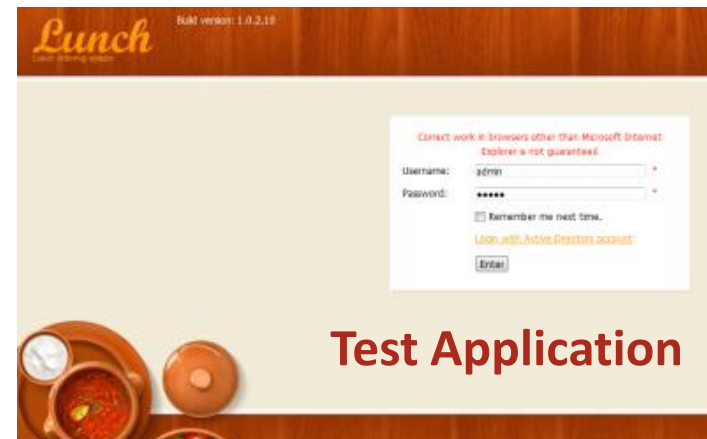

## Google Site

## Final Exam

## Test Application

# Boot Camp Organization

- **Each subject includes:**
  - Workshop
  - Individual Homework assignment
  - Team assignments
  - Applying skills on our Test Project

# Boot Camp Organization

- As the result we'll get:
  - Passed Final Exam
  - Individual Score
  - Feedback from Mentors, Lectors and Curator

**Personal Awards  
(Top 3 Mentees)**

**Team Award**

**Gifts and Suprises**

# Participants

# Reality

- Competition is too high
- Mentor is not needed
- Curator must be full time dedicated
- But no extra motivation with home tasks

# Web Testing boot camp

# Boot Camp Organization

- Mix people with diff levels
- Add more technical topics
- No mentors

# Participants

# Results

- One application is cool
- High cooperation inside
- 2.5 month is optimal
- Mentor is not needed but trainer should conduct additional meetings

# Plans and Ideas for Future
